EXPERIMENT

Title

SUB ARRAY WITH MAX SUM

Description

You are given a list of integers, and your task is to find the subarray with the maximum sum. Write a function or method to solve this problem efficiently and return the maximum sum.

Input:

n: the no of elements in the array

nums (List of integers): A list of integers (1 \leq len(nums) \leq 10^5)

3210

050

Sample input:

8

-1 2 3 10 -4 7 2 -5

Sample output:

20

A1059

Explanation:

The max subarry sum is 20. The subarray is [2,3,10,-4,7,2]
